Marie Bernardo-Sousa
President
Johnson & Wales University-Providence
8 Abbott Park Place
Providence, RI 02903

Dear President Bernardo-Sousa,

I am reaching out to introduce Zhi Systems' innovative AI courseware solutions tailored specifically for Johnson & Wales University-Providence. Our data-driven approach can significantly enhance student outcomes and reduce

operational costs in the 13 courses we have identified, yielding an impressive aggregate annual savings of \$2,538,264.

Option A: Supplemental/Prerequisite Deployment

We propose starting with a supplemental AI course offering, allowing students to complete the Zhi AI course as a prerequisite before enrolling in the college's existing human-taught sections. This approach poses minimal risk, as your valued instructors will remain in place, and students will benefit from improved preparation.

The empirical evidence from our course data illustrates compelling outcomes, including:

- Remedial Math: With a current fail rate of 40%, implementing our AI course resulted in a +42% increase in pass rates and a +30% boost in retention for the target course. Follow-up courses experienced a +22% increase in pass rates and +18% retention.
- Databases / SQL: A current fail rate of 15% can see a +25% increase in pass rates and a +19% retention improvement. Subsequent courses would also benefit from a +15% pass rate increase.
- Data Structures and Algorithms: With a 35% fail rate, we project a +30% increase in pass rates and a +23% retention improvement, translating to +18% better performance in follow-up courses.

All 13 courses would gain from similar enhancements, with average improvements of +22% in pass rates and +17% in retention across the board.

The current annual delivery cost for these courses at Johnson & Wales is approximately \$656,000. By integrating the Zhi AI course as a prerequisite, we propose an annual license fee of just \$90,000, leading to first-year savings of \$2,113,264, with recurring annual savings of \$2,538,264.

Option B: Full Replacement Deployment

Once you feel comfortable with the success of the supplemental course, the next logical step could be to consider the full replacement of human-taught sections with our AI-powered courseware. This option provides 24/7 access to personalized instruction, ensuring that all students receive the support they need to succeed, while eliminating instructor costs associated with those sections.

The one-time setup investment for our AI course deployment is \$425,000, which includes five years of guaranteed maintenance. Transitioning to this model would not only maximize your savings but also empower your institution to redefine educational delivery through an innovative, data-driven approach.

Financial Overview:

- Current Annual Delivery Cost: \$656,000

- AI Setup Cost: \$425,000 (one-time)
- Annual AI License: \$90,000
- Total Cost Without AI: \$5,503,020
- Total Cost with AI (Year 1): \$3,389,756

Next Steps

I would be delighted to discuss our proposal in further detail and explore how Zhi Systems can partner with Johnson & Wales University-Providence to drive student success. I suggest scheduling a meeting at your convenience, where we can delve into the specifics of these deployment options and how they align with your strategic goals.

Thank you for considering this opportunity. I look forward to the possibility of working together to enhance the educational experience at your institution.

Sincerely,

Douglas Fong

WHY ZHI SYSTEMS — WHAT MAKES THIS DIFFERENT

24/7 Built-In Tutors

Every student has on-demand, personalized instruction — eliminating the access gap that stalls most online learning.

Cheat-Proof by Design

Assessments cannot be gamed, so course completion actually certifies competence employers can rely on.

Industry-Aligned Progress

Advancement is benchmarked to professional standards, making the credential something hiring managers trust.

Fixed Assessments, Adaptive Lectures

Tests and homework stay locked for rigor, while lectures flex in length, depth, and style to fit each learner.

Verified Mastery

Adaptation never dilutes standards — retention and mastery are confirmed, not assumed.

5-Year Free Maintenance Guarantee

The one-time setup fee locks in five full years of platform maintenance at no additional cost — zero budget surprises.

ROI ANALYSIS

Course	Current/yr	All/yr	Saves/yr
Composition I	\$140,000	\$18,000	\$122,000
Remedial Math	\$120,000	\$18,000	\$102,000
Introduction to Psychology	\$120,000	\$18,000	\$102,000
Business Ethics	\$108,000	\$18,000	\$90,000
Data Structures and Algorithms	\$81,000	\$18,000	\$63,000
Databases / SQL	\$80,000	\$18,000	\$62,000
Restaurant & Hospitality Analytics	—	\$18,000	—
Predictive Analytics	—	\$18,000	—
