The AI features we offer, such as adaptive pacing, embedded diagnostics, built-in tutoring, and job-readiness benchmarking, align closely with PCC's commitment to improving student success and reducing the 82.3% dropout rate while maintaining an in-state tuition of \$8,000.

To move forward with this innovative solution that promises both cost efficiency and enhanced learning outcomes, I propose scheduling a meeting at your earliest convenience. We can discuss the implementation process, address any questions you may have, and outline how Zhi Systems can support PCC in its mission to provide quality education.

Thank you for considering this opportunity to transform educational delivery at Portland Community College. I look forward to your response.

Sincerely,

Douglas Fong
